

Materials: Solids, liquids or gas?

Solid - something you can pick up.

Liquid - can flow or be poured easily

Gas - something you often cannot see or smell like oxygen.

Sort the following objects into the correct headings:

Milk, crisps, air, water, book, oxygen, ice, biscuit,
apples, lemonade, fruit juice, brick, coffee, helium.

(think of balloons that make your voice go squeaky)

Solids

Liquids

Gas
